

## WORK EXPERIENCE

### ❖ iCIMS

*Software Engineer*

**Holmdel, New Jersey (Remote)**

**Jun. 2021 – Oct. 2022 | Aug. 2023 – Present**

#### Highlights:

Worked on multiple projects and teams, helped maintain a clean codebase working in a microservices oriented architecture. Used Agile methodologies with the Atlassian software suite to estimate, log, and track work. Collaborated with teammates and maintained our own CI/CD pipelines for multiple repositories.

- Collaborated with teams in multiple countries/timezones on React frontend components coupled with NodeJS API gateways/Java backend services with a strong focus on testing and maintainability.
- Used products such as SonarQube, Jenkins, Graphana and SumoLogic to ensure code quality for all new and existing work.

### ❖ JPM Chase

*Software Engineer III*

**Buckhead, GA**

**Nov. 2022 – Aug. 2023**

#### Highlights:

Joined for the establishing of Atlanta as a new Tech Hub for JPM Chase. The team I helped build inherited a very storied project with a great deal of opportunities for improvement.

- Worked with an international team of developers and product owners on maintaining a monolithic Java application. Helped plan an upgrade of the existing monolith to micro services with Spring Boot and micro frontends with React.

### ❖ Toolbox No. 9

*Software Engineer*

**Atlanta, GA**

**Oct. 2018 – Jun. 2021**

#### Highlights:

The company worked primarily in the digital marketing space, and as a member of the dev team there I worked closely with our in house product managers and designers to implement clean, responsive UIs. We held our software practices to high standards to ensure accessibility and testability.

- Worked on enterprise client projects using Angular/AngularJS, React, and AWS to create full stack web applications
- Worked on smaller client projects:
  - Used NodeJS/ExpressJS servers and lightweight frontend code for international sites being accessed in areas with weak internet connections
  - Worked with AWS and Firebase (GCP)

### ❖ Insiten

*DevOps Engineer / Software Engineer*

**Peachtree Corners, GA**

**Jan. 2017 – Oct. 2018**
