

PROFESSIONAL SUMMARY

Software engineer with 8+ years of experience collaborating with cross-functional teams, translating business requirements into technical solutions, and delivering customer-focused products. Proven track record of working closely with product managers, stakeholders, and international teams to prioritize features, refine requirements, and deliver high-quality software using Agile methodologies. Strong technical foundation combined with demonstrated ability to bridge the gap between business needs and technical implementation.

WORK EXPERIENCE

❖ **iCIMS**

Software Engineer II

Software Engineer I

Holmdel, New Jersey (Remote)

Aug. 2023 - Present

Jun. 2021 - Oct. 2022

Collaborated with product managers and stakeholders across multiple countries to gather requirements, prioritize features, and define acceptance criteria for new functionality. Participated in Agile ceremonies including sprint planning, backlog refinement, retrospectives, and daily standups, contributing to product roadmap discussions. Analyzed user feedback and system metrics using SumoLogic and Grafana to identify improvement opportunities and inform product decisions. Worked in microservices architectures using React frontends and NodeJS/Java middleware, understanding the full product lifecycle from concept to deployment. Used Atlassian suite (Jira, Confluence) to document requirements, track progress, and maintain product documentation.

JPM Chase

Buckhead, GA

Senior Software Engineer

Nov. 2022 - Aug. 2023

Collaborated with international product owners and business stakeholders to modernize a legacy monolithic application into a microservices based architecture. Contributed to strategic planning for platform migration to Spring Boot microservices and React micro frontends. Identified technical debt and improvement opportunities, presenting recommendations to product leadership. Worked closely with business analysts to translate complex business requirements into technical specifications.

Toolbox No. 9

Atlanta, GA

Software Engineer

Oct. 2018 - Jun 2021

Partnered directly with in-house product managers and designers to define requirements and implement customer-facing features for enterprise clients and smaller one off sites. Gathered user feedback and conducted competitive analysis to inform product decisions in the digital marketing space. Ensured accessibility and usability standards were met across all deliverables, advocating for user experience best practices. Built and maintained full-stack web applications using Angular, React, AWS, and NodeJS for international markets.

Insiten

Peachtree Corners, GA

DevOps Engineer / Software Engineer

Jan. 2017 - Oct. 2018

Managed CI/CD pipelines and deployment processes, understanding the full software development lifecycle. Collaborate with enterprise clients to design, develop, and implement SharePoint site takeovers
